PROJECT PROPOSAL: ENTERPRISE DATA PRIVACY SHIELD

Prepared For: TrustVault Governance Council

*** SYNTHETIC TEST DOCUMENT - TRUSTVAULT SECURITY EVALUATION ONLY ***

Objective: Implement automated PII redaction and synthetic token replacement for AI assistant queries.
Scope: Scanning document uploads for SSNs, credit cards, emails, and API keys before external disclosure.
Timeline: Phased implementation covering client preview, worker redaction, and owner attestation.
Budget and Resource Allocation: Zero additional dependencies, utilizing native cryptographic primitives.
Success Metrics: 100% detection rate on high-risk patterns with zero false-negative credential leaks.
Attestation: Synthetic proposal document for workflow validation and permissions testing.
