TRUSTVAULT USER GUIDE: SECURE DISCLOSURE & COLLABOR

Standard Operating Procedure // Version 2.4

*** SYNTHETIC TEST DOCUMENT - TRUSTVAULT SECURITY EVALUATION ONLY ***

Welcome to TrustVault: The enterprise platform for zero-trust document sharing and verification.

1. Uploading Files: Navigate to Vault Upload, select your file, categorize it, and verify checksum.

2. Managing Permissions: Open document details, choose Permissions tab, and grant granular Read or Edit rights.

3. Generating Share Links: Create anonymous, single-use, or expiring public links with recipient watermarking.

4. Verifying Audit Logs: All access and modification events are permanently written to an immutable SHA-256 log.

Attestation: Synthetic user documentation artifact used to test preview, download, and multi-user access.
